

Huron Field Ledge

Geology: 90% Dolomite Limestone, 10% Soo Lock Sandstone

Product weight:

- Thin veneer: 10-14 pounds/square foot
- Not available in full-bed depth

Color: 90% various shades of gray and buff, 10% various shades of red, with a range of molted to solid in color

Length: 6-20 inches (average of 12 inches)

Height: 1-8 inches (average of 5 inches)

Width (depth):

- Thin veneer: .5-1.5 inches
- Not available in full-bed depth

Corner returns: Varies in length of return, minimum of 3 inches

Typical piece: Rough-cut stone with a natural cleft top and bottom. Face of stone is a mixture of split and seam face. Ends are random and not trimmed. Field Ledge will have approximately 10-20 percent in irregular (non-linear) shapes. Backs are sawn for thin veneer. Not available in full-bed depth.

Please note: The beauty of natural stone is in its variety and range of color. These small pictures/samples are not fully representative. We do not recommend making a selection based on pictures alone.
