| STONE TYPE        | Dolomite Limestone                                                                                             |                          |
| COLOR             | 90% various shades of gray, 10% various shades of white, cream and buff. Stone is sourced from three quarries. |                          |
| HEIGHT            | 1-8 inches (average of 5 inches)                                                                               |                          |
| LENGTH            | 6-20 inches (average of 12 inches)                                                                             |                          |
| NOMINAL THICKNESS | THIN VENEER                                                                                                    | .5-1.5 inches            |
|                   | FULL BED                                                                                                       | 3.5-4.5 inches           |
| APPROX. COVERAGE  | THIN VENEER                                                                                                    | 10-14 pounds/square foot |
|                   | FULL BED                                                                                                       | 35-40 square feet/ton    |
| CORNER RETURNS    | Varies in length of return, minimum of 3 inches                                                                |                          |

TYPICAL PIECE

Rough-cut stone with a natural cleft top and bottom. Face of stone is a mixture of split, bed and seam face. Ends are random and not trimmed. Approximately 20% irregular (non-linear) shapes. Backs are sawn for thin veneer. Full-bed depth is split to thickness.

Hold it before you decide.
